Allen Organ Company proudly introduces the Diane Bish Signature Series DB-36Q

Concert and recording artist, composer, conductor and *The Joy of Music* television personality, Diane Bish has displayed her dazzling virtuosity and unique showmanship the world over. Through numerous recordings, concerts and weekly television appearances, Diane Bish is the most visible American organist today. Diane and the Allen Organ Company have jointly developed a series of instruments with her own special design touches. This newest and most affordable addition makes it possible for more churches than ever before to enjoy the beauty and prestige of owning a Diane Bish Signature Series instrument.

Distinctive voices skillfully selected by Diane Bish and Allen's exciting Renaissance Quantum™ technology combine in these exciting 36 Stop, TWO-MANUAL consoles that encourage organists to achieve new heights of musical splendor.

The DB-36Q includes four distinctly different stop lists, including: American Classic, English Cathedral, French Romantic and Neo-Baroque Voices (an Orchestral specification may be chosen as an option to the English Cathedral Voice) as well as Acoustic Portrait™, the only sampled reverb offered in any digital organ.

Special finish and etched Signature Series brass plaques are available for each console, along with these unique touches personally chosen by "The First Lady of the Organ," Diane Bish: Deep cherry finish with custom high-gloss accents; Red tutti buttons and red felt keyboard treatments; and special illuminated lattice-style wood music rack.
