

PRESS RELEASE
April 4, 2008

**ROSEMARY PRESBYTERIAN CHURCH, BELFAST, NORTHERN
IRELAND
INSTALLS THREE-MANUAL ORGAN**

The ALLEN ORGAN COMPANY of Macungie, PA, the world's largest builder of church organs, announces the installation of a new 50 Stop, Three-Manual organ at Rosemary Presbyterian Church in Belfast, Northern Ireland.

Rosemary Presbyterian Church can trace its origins back as far as 1723. The present church building is a result of a union between the Ekenhead and Rosemary Street Congregations after the Rosemary Street building was destroyed in an air raid in 1941.

The original pipe organ, located in a purpose built chamber, was replaced in the early 1970s by an Allen Two-Manual organ. The Allen continued to serve the church until 2007 when it was replaced with a new Three-Manual custom Quantum™ Allen built in an English-style console. The expansive audio system has been placed inside the original pipe chamber which was used as a store room after the pipe organ was removed. The music program also benefits greatly from Allen's Expanded Audio Capability (EAC™) which is also part of this installation.

Joel Hurley of the Allen Organ Company visited Northern Ireland in February of 2008 to assist the local Allen representatives with the final voicing and regulation of the organ.

Organist Billy Cairns and the church's congregation are thrilled with the magnificent tonal results of their new organ installation. Organist Carlo Curley will give a special dedication concert in June 2008.
