**Diane Bish Performs Allen Organ Dedication Concert  
in Historic Virginia Church**

Situated in the heart of historic Old Town Manassas, Trinity Church was originally founded as Dentigen Parish in 1745. The parish changed its name to Trinity Church in 1872. The present building dates from 1922. On Sunday, October 18, 2009, Ms. Diane Bish performed the dedication concert to a packed house. The concert was a great success.

Church officials report that the organ has provided new vitality to the music program, an important part of this church's long-standing status in the community. The installation was designed and completed by Jordan Kitts Music, Inc., College Park, Maryland. The Allen Heritage console controls 58 digital stops and 10 ranks of Reuter pipe work that comprises a full Great principal chorus, plus an 8' trumpet and a pedal stop. The instrument also features Allen's Interlaced Audio™.

The striking French "terrace-style" console in two-tone oak finish, features custom-designed drawknobs with rosewood stems and maple faces, reverse color-scheme keyboards with rosewood sharps, black naturals and tracker touch, and an adjustable-height music rack and bench.
