Allen Builds a Two-Manual *French Terrace-Style Console*

Demonstrating its engineering flexibility and creativity, Allen Organ Company has designed and built a custom French terrace-style two-manual 37-stop organ with the Company's Quantum™ technology.

The console's most striking feature is its oak-finish side panels inlaid with rosewood, coordinating with rosewood drawknob stems and rosewood sharp keys on the keyboards and pedalboard. The drawknob faces are maple, with sequential numbering and reeds engraved in red. The console has a lighted, acrylic music rack/pedal light package, parallel keybeds, and square-style keycheeks.

The customer selected a *Schlicker* stop specification. In addition to the Schlicker stop list, this custom organ includes six alternate stop lists, any of which can be invoked in a few seconds, making this unique instrument both visually stunning and musically versatile!
